Claims 1 – 99 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Paragraphs [046] through [048] of the application do not support “in an unreduced state.” The failure of the application to describe active performance of a reduction step, even under implied circumstances wherein an oxidation step may have taken place, is not evidence that the applicant was cognizant that the materials were in an unreduced state. If circumstances or conditions were described in sufficient detail that it was inescapable for the materials at issue to be in anything but an unreduced state, e.g., an oxidized state, then applicant might have some foundation for arguing that the unreduced state was inherently described in the specification. Such, however, does not appear to be the case in this application.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any

Art Unit: 1724

extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
